

FUNKTION-ONE

INFRABASS 218

The patented Infrabass 218 is a completely new Andrews' bass design aimed at the octave from 30 - 60Hz. It delivers copious quantities of wonderfully smooth, deep bass for a powerful sonic experience. Forming the low-end foundation for the Dance Stack, the Infrabass can also give tremendous authority to Resolution 2s adding yet a further dimension to their application. With attention to timing, the Infrabass can be combined with F218s to give the extension and depth of a much larger system. Due to the very large current requirements of extreme low frequencies, only amplifiers with high calibre power supplies will realise the full potential of this product. The optional Double InfraHorn, shown overleaf, can provide significant additional loading (extra 10dB at 33Hz) for a pair of Infrabass 218s in applications with extreme bass requirements.

Features:

- Completely new loading design
- Bass extension right down to 20Hz
- Funktion One designed drivers
- Dimensionally identical to F-218
- Includes a curved stainless steel grill
- Integral handles
- Optional wheels

Driver	Freq. Band	Sensitivity (1W at 1m)	Power (rms)	Nominal Impedance
2x18"	20 - 80Hz	103dB	1200W	2 x 8Ω 4Ω Total

Frequency Response ± 3dB:

25Hz - 80Hz

Weight (ceramic magnets):

90 kg (198 lbs)

Construction:

18mm Birch ply

Connectors:

2 x Speakon 4 Pole (NL4)
