

F5

The F5 is a compact loudspeaker with a big sound suitable for a wide range of applications. A unique Funktion-One high sensitivity 5" loudspeaker produces a full range of frequencies from one voice coil ensuring excellent coherency. These properties in combination with its class leading vocal intelligibility make it well suited for distributed public address systems, bars and restaurants, as well as domestic applications such as home theatre and desktop monitoring.

Funktion One's range of compact bass loudspeakers can be partnered with the F5 for additional low frequency extension.

Features:

- Bespoke wide range 5" driver
- High sensitivity
- Integrated passive filter for low frequency protection
- Up to 8 units can be connected in parallel
- Angled cabinet for desktop use
- 3/8" microphone stand mount
- Optional yoke for stand or suspension
- Optional 70/100V line transformer

Driver	Operating Band	Sensitivity (1W at 1m)	Power (AES)	Nominal Impedance
5"	100Hz-up	94dB	30W	16Ω

Frequency Response $\pm 3\text{dB}$:

160Hz - 13kHz

Weight:

2.7kg (5.9lbs)

Construction:

12mm Birch plywood

Connectors:

2 x Neutrik NL4

or Phoenix installation connector
